

Safe and Accessible Cycling

Leonardo Venturoso

Let's begin

Meet Luca

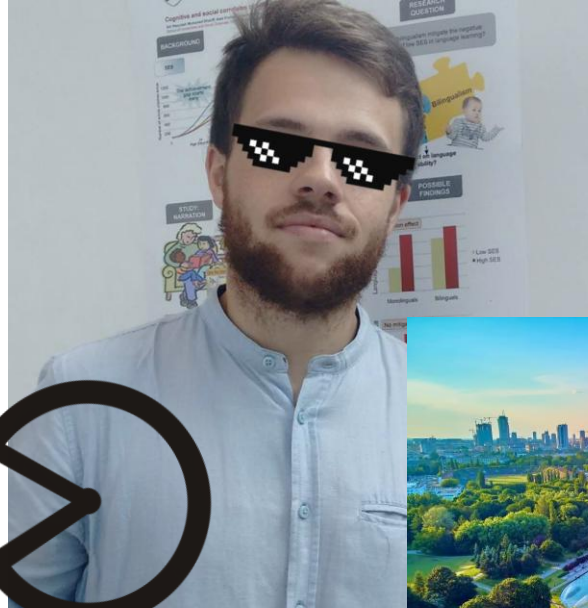

Let's begin

Let's begin

Let's begin

Let's begin

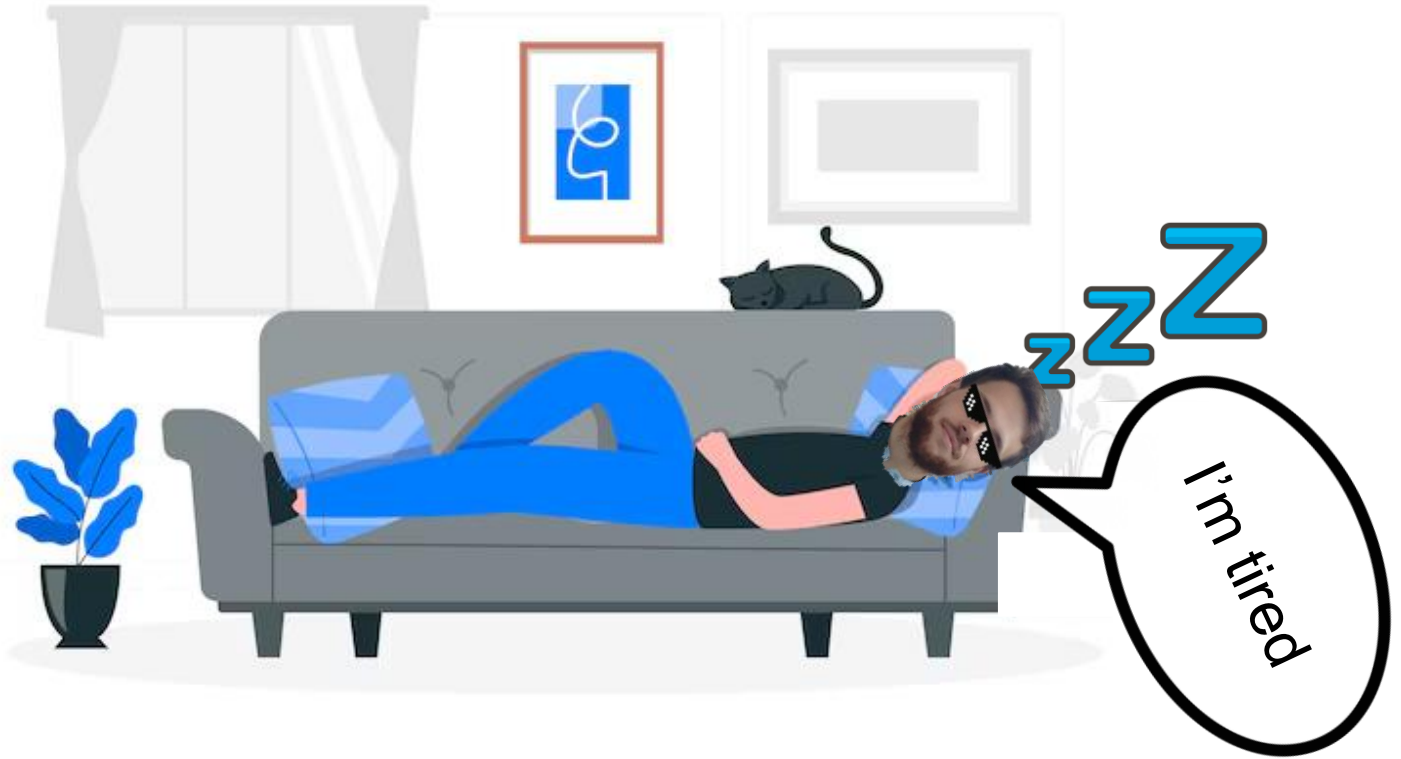

#SaveThePlanet

Let's begin

Let's begin

How do you think Luca manages to go to work every morning?

How do you think Luca manages to go to work every morning?

a) Walking?

How do you think Luca manages to go to work every morning?

a) Walking?

a) Cycling?

How do you think Luca manages to go to work every morning?

a) Walking?

a) Cycling?

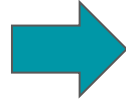

or...

How do you think Luca manages to go to work every morning?

c) Driving his dad's new super full equipped Golf!!!!

Our goal

Why we care so much about this?

"Let's talk about 'Bicycle Traffic Stress.'

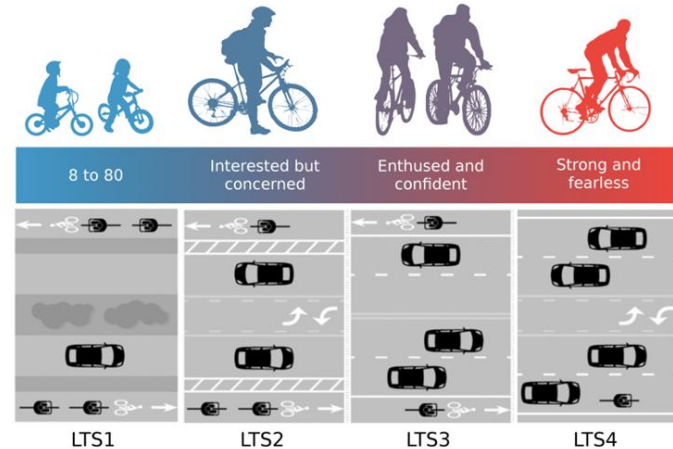

"Let's talk about 'Bicycle Traffic Stress.'

"Let's talk about 'Bicycle Traffic Stress.'

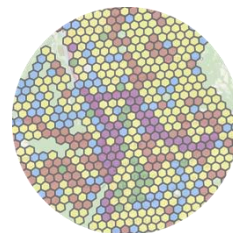

The **Bycicle Traffic Stress** concept is a detailed metric used to evaluate *the range of difficulties and discomforts encountered by cyclists on specific road segments*. It **encompasses** both the immediate **feelings of discomfort, anxiety, or danger experienced by cyclists**, as well as the wider **effects of factors such as infrastructure design, vehicle behavior, environmental conditions, and topography***.

Levels of Traffic Stress

* Winters, M., Davidson, G., Kao, D., & Teschke, K. (2011). Motivators and deterrents of bicycling: comparing influences on decisions to ride. *Transportation*, 38, 153-168.

Our research questions

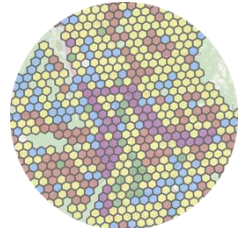

Our research questions

- Which streets/areas make cyclists want to cry, so exhibit high level of traffic stress?

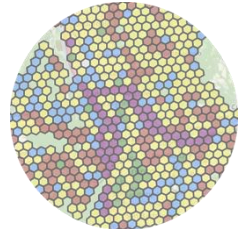

Our research questions

- Which streets/areas make cyclists want to cry, so exhibit high level of traffic stress?
- Which streets are so bike-friendly that even someone who hasn't ridden a bike since middle school could casually cruise to the nearest pizza joint without breaking a sweat?

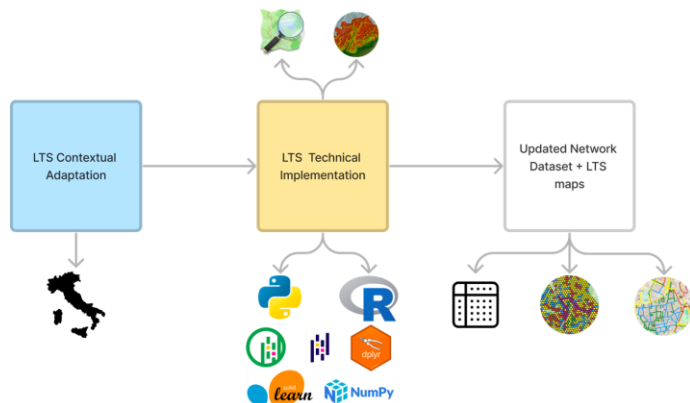

Our research questions

- Which streets/areas make cyclists want to cry, so exhibit high level of traffic stress?
- Which streets are so bike-friendly that even someone who hasn't ridden a bike since middle school could casually cruise to the nearest pizza joint without breaking a sweat?
- How many critical high-stress gaps exist in bike-friendly street networks that urgently need to be addressed?

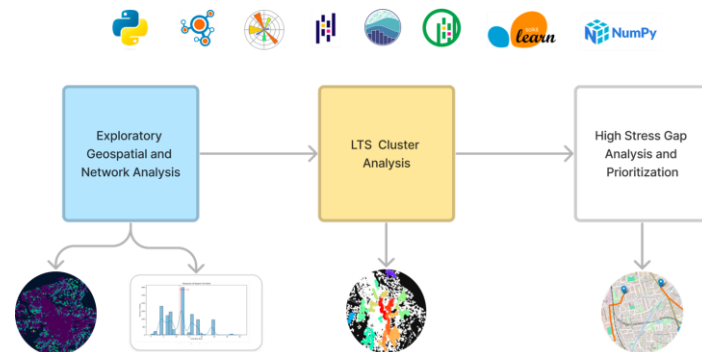

What we did

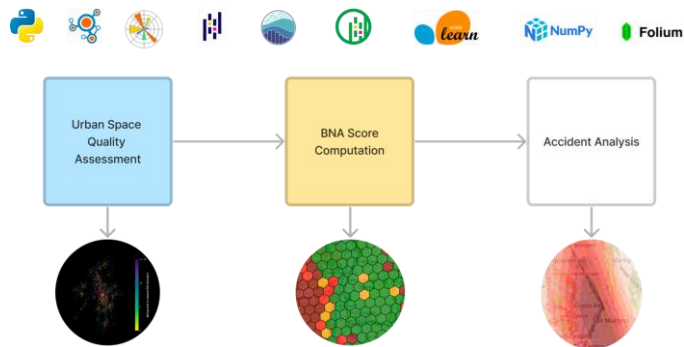

Stage One: Adaptation of the LTS Scoring Process

Stage Two: Infrastructure and Network Analysis

Stage Three: Qualitative Analysis

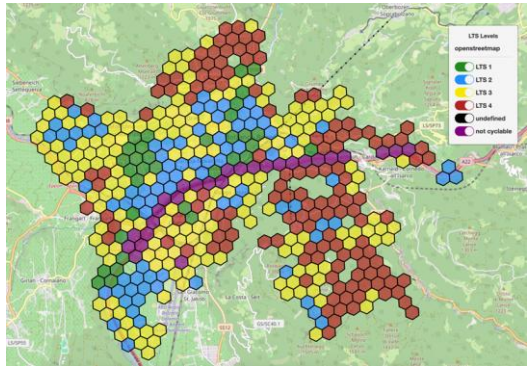

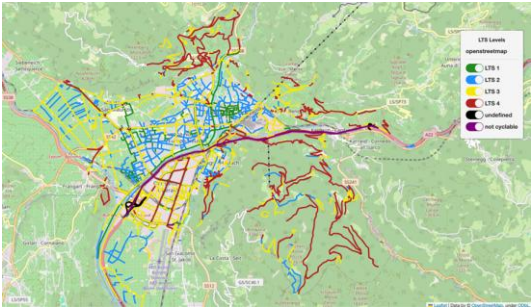

Final Steps Analysis

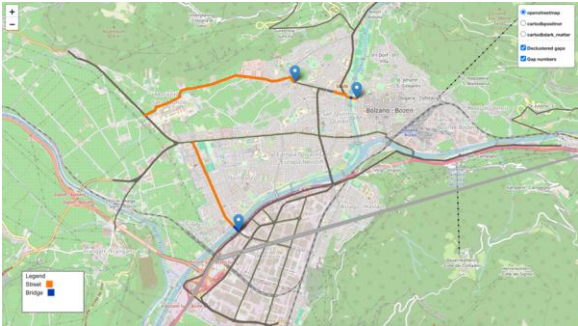

Our results

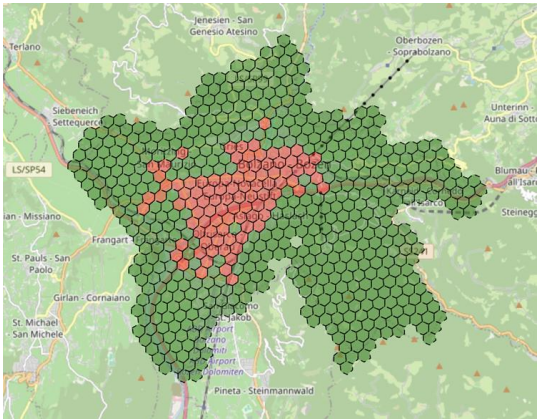

Bolzano Levels of Traffic Stress

Bolzano High Stress Gaps

Bolzano High Risk Areas Predicted

Conclusion
